**ABSTRACT:**

This paper interests to investigate on the subjects of the papers presented in the Input-Output (I-O) conferences to reveal the direction of studies in terms of i-o technique during 1998-2008 period. To this end, all papers presented at different i-o conferences are studied to categorize them into some areas with respect to their subjects. It is also expected these classification can be continued into a new subdivisions to make possible the study in more detail. It is notable the classification of the papers are to somewhat based on the conferences programmes. The number and trend of the papers concern to each group and subgroup are analysed to reveal the direction of studies in terms of i-o in the world.
