

## **Eurostat's regular estimations of CO2 emissions from final use of products in the EU**

Topic: Supply, Use and IO Tables: Global value chains, economic growth and environment

Author: Stephan Moll

Eurostat produces and publishes on a regular basis Air Emissions Accounts (AEA) and monetary Supply and Use, and Input-Output Tables (SUIOT). Both are connected and used for Leontief type IO modelling to estimate 'carbon footprints' associated to final use of products in the EU economy. The paper describes in detail the data sources and the methodology applied and presents results.
