**COUNTRY: SPAIN**

**KEYWORDS: ENTERPRISE IO MODELS ; ENTERPRISE IO ACCOUNTS ;**

**PAPER CONFERENCE CODE: 177**

**FULL PAPER IN CD?: NO**

**ABSTRACT:**

Using the basic structure of the IO accounts, we have built both Enterprise Input-Output Accounts and a Model for a Hotel in the Tourism Industry. We have used the model to simulate the effects of the expansion of the demand. These simulations show the power of the model in the area of client analysis. Other possibilities include applying the price model to the Enterprise IO Model.
