

## CALL FOR PAPERS

### 24th International Input-Output Conference July 5th – 8th, 2016, Seoul, Korea

Chair of the Scientific Program Committee (SPC Chair)  
Satoshi Inomata, Institute of Developing Economies, JETRO  
satoshi\_inomata@ide.go.jp

#### **[Paper submissions]**

Please follow the navigation through our online article submission system “COPASS”.

<https://copass.iioa.org>

Each author is permitted to present a maximum of *two* articles at the conference (yet can be a co-author of a number of submitted articles).

Abstracts are individually reviewed by the members of the Scientific Program Committee. Authors are requested to provide in abstracts the following information about the submitted articles:

- (1) the research question,
- (2) the method used,
- (3) the data used (if any), and
- (4) the novelty of the research.

Failing to do this may disadvantage the selection of the article.

On the other hand, if a corresponding full paper (of at least 2,000 words) is accompanied at the time of abstract submission, it will significantly increase the possibility of acceptance.

Please note that

- (1) Acceptance of an abstract,
- (2) Submission of an electronic version of the full paper,

AND

(3) Completion of registration and payment of the appropriate conference fee by the presenter  
are the NECESSARY CONDITIONS for securing a spot on the final program.

Also, the SPC Chair reserves the right to withdraw any articles from the program if it is found that the corresponding presenter shall not show up to the conference.

Important note: if a presenter did not show up to the conference without any prior notification to the SPC Chair (one day beforehand at the latest), this will be counted as a “no-show”. A no-show causes a significant loss for the conference as it crowds out a potential presentation which would otherwise have taken the slot.

Due to an increasing number of participants in the IIOA conferences, the Scientific Program Committee puts every effort to make the best use of available slots in the program, by reducing no-shows as far as possible. We sincerely ask for the earliest notification if a presenter finds him/herself unavailable for a presentation at the conference.

### **[Organized Sessions]**

At past International Input-Output Conferences, pre-planned sessions organised by attendees have been most successful in terms of the number of attendance and participant interaction. For this reason, we strongly encourage proposals for sets of thematic sessions. In proposing such sessions or sets of sessions, please send the SPC Chair by the deadline an e-mail including:

- (1) the name and institutional affiliation of the organiser,
- (2) title(s) of the organised session(s)
- (3) abstract(s) describing the theme/objectives of the session(s),
- (4) names and institutional affiliations of session chair(s).
- (5) titles of the presentations therein (4 presentations per session),
- (6) names and institutional affiliations of the presenters.

Once the session proposal is accepted by the SPC Chair, the individual article submission procedure as specified above should follow for each of the presentations planned for the proposed sessions.

### **[Travel Grants]**

The IIOA has limited funds to encourage young experts holding a citizenship and residing in non-High Income Countries (World Bank definition) to attend the conference. To view the list of eligible countries [go here](#). As many as fifteen travel grants amounting each up to US\$2,500 are available. Applicants must be valid IIOA members born after 1975 and must also present an unpublished paper. Those who received travel grants in any of the three previous IIOA Conferences are excluded from the application process. The Travel Grant Committee of the IIOA will verify applicant qualifications and bestow the grants to those qualified applicants with the most promising papers. Authors who wish to apply for a travel grant should submit their full paper to the SPC Chair by the specified deadline.

### **[Leontief Memorial Prize]**

The IIOA is pleased to announce a Leontief Memorial Prize 2016 for the best conference paper of young authors (born after 1975, unpublished work combining theory and application). All co-authors must meet the above “young author” criteria. The Leontief Memorial Prize Committee of the IIOA will verify applicant qualifications and select the winning paper, which will be automatically considered for publication in the journal of the Association, *Economic Systems Research*. Authors who want to compete for the 2016 Leontief Memorial Prize should submit their full paper to the SPC Chair by the specified deadline.
