

Klaus Hubacek is an ecological economist with a research focus on conceptualizing and modeling the interaction between human and environmental systems. Klaus has worked extensively with stakeholders in participatory research projects and led large interdisciplinary research teams. He has published close to 200 peer-reviewed book chapters and journal articles on topics such as climate change adaptation and mitigation, participatory modeling, management of ecosystems services, land use change and governance. Klaus has conducted studies for a number of national agencies in Austria, China, Germany, Japan, the UK, and the U.S. and international institutions such as the European Commission, and the World Bank. Currently, he is on the advisory board for the City of Shanghai Climate Center in China and for the Sustainable Land Management Program of the German Federal Ministry of Education and Research; he serves on the editorial board of a number of scientific journals and is council member of the International Input-Output Association. Currently he holds affiliations with the International Institute for Applied Systems Analysis in Austria and the Chinese Academy of Sciences.
